Email: mainyuvraj05@gmail.com

Mobile: [+91 9056706317](tel:+919056706317)

SKILLS

Programming Languages: C++, Java, Python, JavaScript

Cloud/DevOps: Docker

Databases: MySQL

Tools/Platforms: Git, GitHub, VMware

Soft Skills: Problem Solving, Teamwork, Logical Thinking, Adaptability

INTERNSHIP

PYTHON ML TRAINING

Jun 2025 - Jul 2025

- Completed a 3 month intensive training focused Python with ML.
- Gained hands-on experience with **core DSA algorithms**.
- Implemented deployment scenarios focused on **scalability, automation, and Model Training best practices**.

PROJECTS

Railway Queue Management :-

Mar 2025 - Mar 2025

- Implemented DSA algorithms using external API integration to assist users with intelligent design suggestions.
- Developed **custom React components** for palette control and display with a modern, visually appealing Tailwind CSS interface.
- Deployed the application on Vercel, ensuring optimized performance, responsiveness, and cross-device compatibility.

Skill Bridge – Side Hustle Platform :-

- Created a side hustle platform named “SKILL BRIDGE” using react and vite , using Django as authentication tool , SQLite as database connectivity.
- Django was used as rest api for client server connectivity, Framer-motion for interactive UI/UX.

Self Healing CI/CD pipeline :-

- CI/CD Base Pipeline** The foundation of the system built using standard tools like Jenkins, GitHub Actions, that handles code build, test, and deploy stages.
- Feedback & Learning Loop** Every fix attempted is logged with its outcome. Over time the system learns which fixes work for which failure types, improving its accuracy and reducing false remediation attempts.

Heart-Attack Prediction Model :-

- Heart-attack prediction model using Machine Learning models like Naïve-Bayes, Decision Tree Classifier, Random Forest, XGBoost.
- 87% accuracy in predicting if a person is likely to have an heart-attack or not.
- Visualization of the comparison of all the models being used in the prediction using Seaborn.

Heart-Attack disease Dashboard Visualization:-

- Created an interactive dashboard using POWER BI DESKTOP and implemented DAX queries to find relations between the patients blood pressure, family history, diet etc.

CERTIFICATES | [LINK](#)

- | | |
|--|----------|
| Python and ML Certification from 07 services IT company. | Oct 2025 |
| W3Grade Java / DSA certification . | Jun 2025 |
| C++ / DSA Programming training for 2 months from ISO-9001 company. | Aug 2024 |

ACHIEVEMENTS

- **Qualified and competed in the Smart India Hackathon (SIH) Gear-Up 4.0 Internal Hackathon**, engineering a cloud-based real-time bus tracking system using GPS, cloud APIs, and geolocation mapping for live vehicle monitoring and ETA prediction during a 36-hour on-campus event. Sept 2025
- **Solved real-time cybersecurity challenges in a 24-hour national-level Capture The Flag (CTF) Hackathon**, demonstrating practical skills in penetration testing, vulnerability assessment, exploit analysis, and network security. Jan 2024

EDUCATION

Lovely Professional University Bachelor of Technology in Computer Science and Engineering; CGPA:6.24	Phagwara, Punjab Aug 2023 – Present
Swami Sant Dass Public School Intermediate (PCM); Percentage:74	Phagwara , Punjab Mar 2021 – Feb 2023
Swami Sant Dass Public School Matriculation; Percentage: 85	Phagwara, Punjab Mar 2020– Feb 2021
